

**Orbital data centers.
For truck stops.**

SUMMER '26 / DECK 1

WHAT WE DO

We sell airline miles to truck stops.

Truck stops buy miles to reward diesel purchases.

Drivers redeem them for flights on existing airlines.

The loyalty app lives in an orbital data center.

THE ORBITAL LAYER

The data center hosts the app.

01

Fuel purchase

Driver buys diesel

02

Orbital server

App + rewards database

03

Airline miles

Balance + flight booking

**We sell
miles.**

Hosting revenue: \$0. Miles revenue: all of it.

Fuel in. Flights out.

- 01** **Truck stops buy miles**
to bring drivers back to their locations.
- 02** **Customers earn miles**
when they buy fuel and food.
- 03** **We pay for real flights**
on existing airlines when miles are redeemed.
- 04** **We keep the difference**
after reward and operating costs.

OUR RESPONSE TO AWS + REGULATORY RISK

\$600M

hosting bill.

AWS asked us to pick a region. We picked orbit.

THE TEAM

Two Forbes honorees. One emergency contact.

NADAV SHOVAL

he/him
