

**Orbital data centers.  
For truck stops.**

**SUMMER '26 / DECK 1**

A CUSTOMER WHO KEEPS COMING BACK

**2,400**  
**truck stops**

AI dispatch.  
Better routes.  
Predictive maintenance.

PROPOSED ROLLOUT

Their trucks stay on the road. Our GPUs do not.

## THE ORBITAL LAYER

# We went where the power is. Straight up.

01

**Truck terminals**

Upload fleet data

02

**Orbital GPUs**

Run the AI models

03

**Fleet decisions**

Routes + maintenance

**We sell  
miles.**

**Compute revenue: \$0. Miles revenue: all of it.**

# Fuel in. Flights out.

- 01 Truck stops buy miles**  
bundled with their orbital compute contract.
- 02 Customers earn miles**  
on fuel, food, and compute usage.
- 03 We pay for real flights**  
on existing airlines when miles are redeemed.
- 04 We keep the difference**  
after reward and operating costs.

THE DATA CENTER IS A

**\$600M**

signup bonus.

Free compute. A very expensive loyalty program.

## THE TEAM

# Two Forbes honorees. One getaway driver.

**NADAV SHOVAL**

Forbes 30 Under 30

**Head of miles**

**PARKER TENNEY**

Forbes 30 Under 30

**Head of valuation**

**PATRICK FINLEY**

Beat Starship at racing

**Head of exits**

## TECHNICAL DILIGENCE

# We have Will.

He spent 12 years at SpaceX.  
We spent 12 minutes with his headshot.

WILL HELTSLEY

## Due diligence complete.

**STOPLINK**

**Invest in dollars.  
Get returns  
in miles.**

Subject to availability.
